

Dear Madam/Sirs

Thank you for asking for input into the plan considerations. Given the need to preserve the special village characterscape and the AONB status our feedback and inputs to the plan would be:

- \* develop only on brownfield sites
- \* adherence to the current settlement boundary
- \* maintaining and protecting the spacious and open green heart areas in the village such as Area12 which should be classified as Low Development Potential
- \* better public transport services eg more or all trains to stop at Colwall station to reduce traffic and the need for car usage. Both for short journeys to Malvern/Worcester/Hereford as well as the London/Birmingham links without the need for changes
- \* no increase to traffic on old church rd. This is already busy and potentially dangerous for pedestrians and when emerging from properties on the road
- \* more robust drainage planning and testing. With the school expansion there has been an increase in runoff causing overflowing drainage systems
