

140115-8

March 8 2015

I attended the meeting on the 14<sup>th</sup> January and though I am late responding just wanted to say I thought the Parish Council had done a good job of dealing with all the complex issues involved. I also think that the speaker explained the issues clearly and with great intelligence and care.

Broadly I supported the plan that the Parish Council suggested and I had no problems with the areas designated as suitable for consideration for housing in the future. However I would like to point out that in an ideal world I would not really wish to have any major further development within the village.

I am keen to try to preserve the character of the village and the beauty of its surroundings for the benefit of the people who live here.
