Dear Sir,

We should like the settlement boundaries to remain unaltered. Colwall village is already one of the longest ribbon developments in the area, and extension of development into green land would only serve to emphasize the built up nature of the village. There is a large brown field site at Schweppes which could support affordable housing and retirement homes. Other brown field sites could be identified for younger residents, although this could involve enlarging the primary school.

The conservation area should be extended to cover Colwall Green , a very attractive area which must be maintained for recreational use, but without any permanent structures , such as a skate park, which due to the lack of teenagers in the area , is not necessary .

I have no business, school or organisational requirements ; I just love the countryside around Colwall, which is the main reason we live here.

If you wish me to comment further, kindly email , enclosing any relevant documents you wish me to consider.

Yours faithfully,
