Hi,

I would like to suggest a better solution for the primary school drop off area and adjacent road.

We find that having cars a few feet from the school gate is dangerous, it would be nice to shrink/remove the turning circle and pedestrianise the immediate area outside the school gate.

I would also like to see a footpath along the green nearest the school as it is dangerous to walk down the road or too wet to walk across the grass and neighbouring drives.

The turning green should also have a designated Coach/Taxi parking area clearly marked on the main road.

Finally, sort out the large puddle opposite the Thai Restaurant.

All of the above would make walking/cycling to school a much safer experience.

Kind Regards
